Dear Avirup Mandal,

We would like to inform you that your paper with number 124, entitled "Galerkin Enhanced Graph-based FEM for Interactive Fracture and Sculpting Applications" is in a short list of candidates to win the VISIGRAPP 2025 Best Paper Award, based on marks provided by the reviewers.

Please note that the actual winner of the award will be selected by the program and conference chairs, from the candidates that actually get their work presented, either physically or online, taking into account the opinion of the session chairs.

The awards will be announced at the closing session, on February 28, 2025, therefore perhaps you'd like to organize your travel arrangements in order to attend the closing session, just in case your paper is actually bestowed the VISIGRAPP 2025 Best Paper Award.

Winners can also get a voucher, for a 50% speaker registration discount or a 100% non-speaker registration discount, redeemable at any INSTICC conference, during the next 12 months. However, only the papers that have a representative present at the closing session to accept the award will actually get the vouchers.

A final note to mention that when a paper quality in this category is exceptional, that paper may be eligible to win other awards if in the end it does not get the Best Paper award.

--

Best regards,
Vitor Pedrosa
